As a Member of the Association in good standing and current on all dues, fees, and obligations, I hereby apply for a Construction Permit from the Cape Carancahua Architectural Control Committee and Board of Directors. I hereby state that I have read and am familiar with the Deed Restrictions of the subdivision and agree to abide by all requirements as set forth in the Restrictions, Conditions and Covenants of Cape Carancahua and the requirements and policies promulgated by the Cape Carancahua Board of Directors and Architectural Control Committee.

I understand that I am responsible for any construction debris and I have informed my contractor he is to keep such debris, and any of his equipment, off any property not owned by me. I understand that I am responsible for damages to the property of others or to CCPOA property or ditches and rights-of-way caused by my contractor. A suitable trash receptacle and sanitary station are required to be on all new home construction sites.

I am familiar with, and have informed my contractor about, the speed limits and truck routes from the construction entrance gate, and other applicable rules set forth by the CCPOA. I have informed my contractor that the construction gate is to be used by vehicles weighing 10,000 pounds or more and that all other vehicles are to gain access through the main entrance. I have also informed my contractor that they must escort vehicles weighing 10,000 pounds or more to the construction site using the truck route.

In the event that I do not abide by the Deed Restrictions, and if corrective action is not taken when requested, I understand and agree that I will be assessed non-compliance fees for each infraction and will be responsible for all attorney fees, court costs, and other damages and expenses incurred by CCPOA that may be necessary to enforce compliance.

The Architectural Control Committee and Board of Directors reserve the right to approve or disapprove the following, per Article 6.02 of the Deed Restrictions, to wit:

6.02a The type and sizes of the proposed construction;

6.02b The quality of materials and workmanship; and

6.02c The harmony of the exterior design in relation to existing structures and the location with respect to topography of the property.

I understand that I am responsible for all required permits from County, State, or Federal agencies and I agree to furnish copies of these permits to the CCPOA Office.

In the event that I cover my culvert or water line, I understand that I am solely responsible for all replacement and repairs should it become necessary for CCPOA or CCWSC to remove the covering and that they are not responsible for any damages to culverts or grounds. I am responsible for all costs incurred.
